Dear colleagues,

On behalf of the Egyptian Society of Child Neuropsychiatry (ESCNP), we cordially invite you all to join us at the International Child Neurology Congress (ICNC) to be held in Cairo, Egypt 2010.

Egypt has been the host of many international events over the past decades; scientifically, politically, artistically and touristically.

From Egypt came the first calendar, the earliest script, the oldest known love-song, the first decorated monumental stone building and the tallest tomb. Egypt which was, the first nation to be completely Christianized, is also home to the Islamic AL Azhar University, which is considered to be the oldest university in the world.

We are constructing a scientific program aimed at advancing academic excellence, presenting the richness of our diverse world (including that of Africa), encouraging international collaboration at all levels, highlighting a developmental perspective in neurology and allied disciplines, promoting the professional advancement of young neurologists, and maximizing the application of continuing medical education credits.

We shall achieve such a program through the enthusiastic contributions of all ICNA members, particularly its scientific sections, as well as those of internationally minded neurologists and health professionals on all continents. You are all welcomed to Egypt to enjoy the recent developments in our profession, while hosted by a country, which is the cradle of civilization.

I hope to see all in Egypt in 2010.

**Dr. Ahmed Raouf**

President of ICNC 2010

Chers collgues,

De la part de l'Association Neuropsychiatrique Pdiatrique Egyptienne (ESCNP), on vous invite cordialement nous joindre au Congr International de Neurologie Pdiatrique (ICNC) qui aura lieu au Caire (Egypte) en 2010.

L'Egypte a t le pays hte de plusieurs vnements internationaux scientifiques, politiques, artistiques, et mme touristiques au long de dizaines d'annes. De l'ancien Egypte on a appris le premier calendrier, la premiere criture, la plus ancienne chanson d'amour, le premier monument dcor et la tombe la plus haute. L'Egypte qui a t la premiere nation tre complment christianis, est aussi la nation o l'on a construit la premiere universit (L'universit Islamique de l'Azhar).

On est entrain de construire un programme scientifique qui va amliorer l'excellence acadmique, reprsenter la richesse et la diversit de notre monde, (l'Afrique inclus), encourager la collaboration internationale sur tous les niveaux, illuminer les perspectives des dveloppements en neurologie et les disciplines relatives, et qui va promouvoir le dveloppement professionnel des jeunes neurologues.

On va obtenir un tel programme travers la collaboration de tous les membres de l'ICNA, en particulier de sa section scientifique, et aussi la collaboration des neurologues internationaux et des professionnels de sant sur tous les continents.

Vous ts les bienvenues en Egypte, centre de la civilisation, pour connatre les dveloppements les plus rcents dans notre profession.

J'espere vous voir tous en Egypte en 2010.

**Dr. Ahmed Raouf**

President de ICNC 2010
